

Homework due Tuesday October 1

1. Read Section 3.2 (pages 95–102) on microscopes and local linearity. Then read it. This is one and the following couple of sections are about the most important ones we will be covering this term and so they should be read several times. There will be a quiz Monday or Tuesday based on sections 3.1 and 3.2
2. On page 102 do Problem 1, 2abc.
3. On page 104 do problems 7 and 8. (These would be good sources for quiz problems so look hard at them.)
