

Creating Spam Filtering in Outlook Express

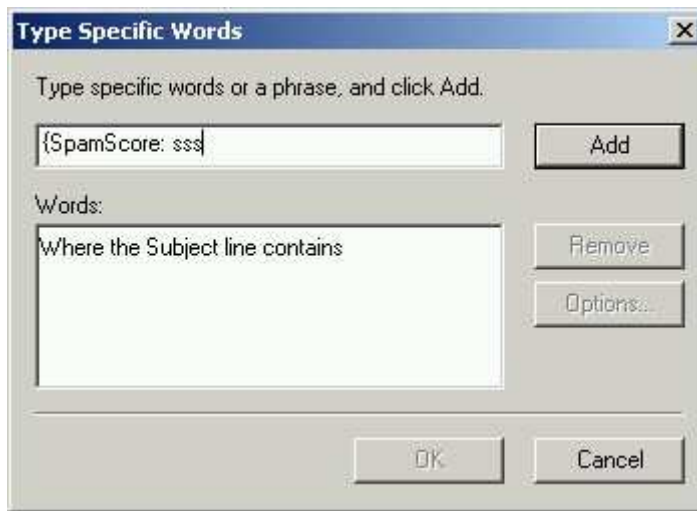

1. From Outlook Express mail, click on **Tools** from the menu, choose **Message Rules** and **Mail**.

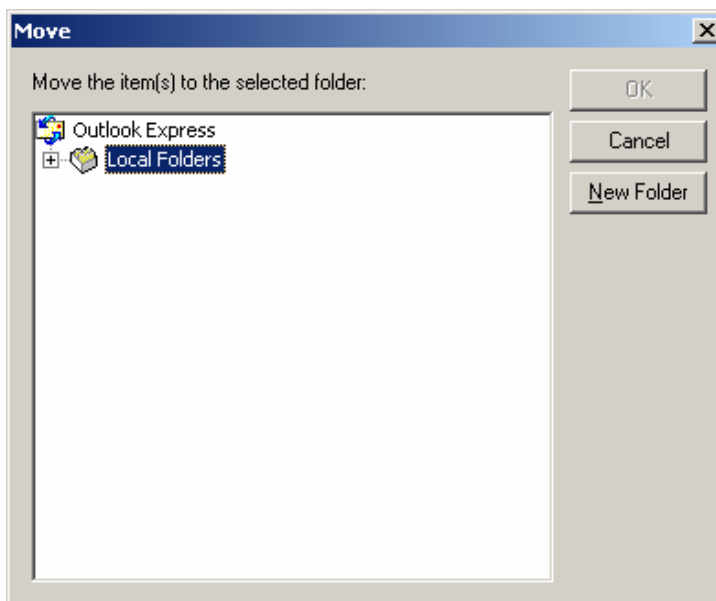

2. In New Mail Rule dialog box, choose “Where the Subject line contains specific words” as the conditions for your rule, choose “Move it to the specified folder” in 2 and set the name of the rule as “Spam”

3. Click **contains specific words** in the **Rule Description** box you will get following window. Type **{SpamScore: sss}** in first box and click **Add** then click **ok**.

4. Click **specified** folder in **Rule Description** box and you will get following window.

5. Click **New Folder**. Input **Spam** as **Folder Name** and click **OK**.

6. Click **Ok** in 3 follow windows.
