You do not need to be a mathematics major to do these jobs, but you do need a strong background. You should have at least a B in MATH 241, and preferably some higher level mathematics coursework. The tutoring positions are in the evening at the satellite locations. Grading assignments are worked out with the course instructor. The pay in either case is \$8/hour. Weekly reports must be made in ITAMS. These will be confirmed with your supervisor(s). It is unlikely that you will be working the maximum number of hours each and every week—such reports will be closely monitored.

Do you have previous tutoring experience? Please describe it: _____
