

Julia Robinson Movie and Talk Night

- ◊ Presented by Dr. McNulty
- ◊ March 24th 2009 6:30 PM
 - ◊ LeConte 312
 - ◊ Refreshments

Julia Bowman Robinson received her PhD in Mathematics from UC-Berkeley in 1948 under Alfred Tarski. She is best known for her work involving decision problems and Hilbert's Tenth problem. (Relating to solutions of Diophantine equations)

Dr. McNulty and Julia Robinson are academic siblings meaning that they both received their PhD under Alfred Tarski.
